REDFLOW NEWS

RedFlow Attends State Reception for Innovators and Educators.

RedFlow's CEO, Chris Winter, and Company Secretary, Iain Smith, were invited to attend a State Reception in honour of Queensland's Education and Innovation sectors on 23 February.

Queensland Premier Anna Bligh hosted the Reception, and firmly re-stated the Government's commitment to creating an economic, cultural and social environment where children are given every opportunity to grow to their full knowledge potential. This will enable the continuation of recent great advances in the knowledge economy in Queensland.

RedFlow strongly supports the promotion of education, innovation and excellence.

Chris was pleased to be able to communicate some details of our growth and future plans to Premier Bligh, Deputy Premier Paul Lucas and Environment Minister Kate Jones.
